CORE COMPETENCIES

- ReactJS, Angular, NodeJS, Java, PHP, Python: Web and Backend Development
- MySQL, SQL, MongoDB: Database Management and Optimization
- Microsoft Office Suite
- Problem-Solving
- Collaboration
- Adaptability
- Communication

WORK EXPERIENCE

- **Volunteer Project: User Management and UI Design - FATEAM (March 2023 - October 2023 | Remote):** My role involved the end-to-end management of the user experience, from design conception to implementation. I collaborated with teams to create intuitive and functional designs, utilizing technologies like ReactJS for interface development, along with HTML and CSS.

- **Full-Stack Development and Project Management Intern Ooka Tecnologia (August 2022 - March 2025 | On-site):** In this role, I developed corporate websites, e-commerce platforms, and financial systems. I utilized technologies like ReactJS for the front-end and Node.js or Python for the back-end, in addition to working with APIs and PostgreSQL databases. I was responsible for the entire development lifecycle, from managing deadlines to collaborating with the team.

- **Software Development Intern - Target Sistemas (May 2025 - Present | Remote):** I work with software development, with responsibilities including bug resolution, system updates, and database management. I use SQL and MySQL to optimize and manipulate project data.
